Friday	8:00--2:00	

Safety Bussing Areas,

St. Anthony area, students living on the southside of the freeway and the SE area having to

Ashton area, elementary students having to cross highway #47 or the railroad tracks.

The routing program we have is working pretty good, provided that addresses have been put in

PredictableRyde is available to parents to see when their student's bus is arriving both in the morning and returning in the afternoon. They can only see the bus that their student is on. The program is funded by parents applying for the app on their computer or phone. It is very helpful if buses breakdown, or have trouble. We can see their location and get to them if needed. It has a history of the bus route history, speed, stops, and if the bus takes a detour from the schedule. We are looking forward to having it help in so many ways.
